

16 July 1981

MEMORANDUM FOR THE RECORD

FROM:

Chief, Intelligence Branch, CRD

SUBJECT:

Meeting Concerning Use of the DARE
Data Base

1. On 16 July 1981 Chief, Intelligence Branch and Chief, Support Staff along with  met with Chief, Information Technology Branch,  to talk about ways of increasing our ability to handle the DARE data base. It was agreed that those handling the data base and attempting to generate reports from it would try to work out whatever problems they encounter and would share their successes and problems with the rest of the group. If unable to resolve the problem as a group, they would then contact  and ask his assistance. He would instruct them as a group. The object of this is to bring all the users of the DARE and ARCINS data bases up to approximately the same level. In conjunction with this, several training courses were recommended.  has not had Ramis Report Writing.  has not had Script and Job Control Language. 
 need these as well as some of the more preliminary courses.

2. Chief, Intelligence Branch expressed the concern that some of the reports we require are needed on a more rush basis and that this system, while useful in the long run, would handicap our ability to serve some of our customers who require listings on a rush basis.  said that in that case we should come directly to him, and he would generate the report himself.
